### CONSERVATION GROUP RELEASES 55,500 FISH INTO LAKE BUCHANAN

#### Second release of the year

The Lake Buchanan Conservation Corporation (LBCC), for the second time this year, released fish into Lake Buchanan today. They released 55,500 Hybrid Striped Bass fingerlings, (2 to 5 inches long). The fish were raised and delivered by Keo Fish Farms of Keo Arkansas. Members of the LBCC and Keo personnel were aided by Steve Magnelia and Marcos De Jesus of the TPWD in their efforts releasing the fish. This stocking was funded by a grant from the Llano County Hotel/Motel Tax Fund as an effort to improve fishing in the lake thus increasing tourism.

March 24 and 25, 2009 the LBCC stocked the lake with 2 ½ million Hybrid Striped Bass fry. Today's release completes the stocking effort by the group for 2009. Since 2006, the LBCC has stocked Lake Buchanan with more than five million of these fish. Since the beginning of 2009 anglers have been catching legal sized (at least 18") Hybrid Striped Bass from these stockings.

The LBCC is a non-profit corporation dedicated to improving the Lake Buchanan area and has 126 members. For more information, visit their web site at [www.LakeBuchananCC.org](http://www.LakeBuchananCC.org)
