Texas Parks and Wildlife Department 2011 Fish Survey of Lake Buchanan to be Reported at LBCC Meeting

Each year, the Texas Parks and Wildlife Department (TPWD) conducts a gill net survey of sport fish populations in Lake Buchanan. Information gathered from the survey is used by the TPWD in making management recommendations to protect and improve the quality and quantity of fish in the lake.

The 2011 survey has been completed and the results will be reported by Marcos De Jesus and his staff at the August 16th meeting of the Lake Buchanan Conservation Corp. Marcos De Jesus is the interim Fisheries Biologist-District Supervisor with TPWD. He is stationed at the San Marcos Inland Fisheries Management office and his primary responsibility is fisheries management of public waters in a 16 county area which includes all the Highland Lakes.

Marcos' program will be a factual report on "The State of the Lake" as concerns populations of the various species of catfish, stripers, white bass, largemouth bass and the newly introduced hybrid striped bass. He will also discuss the health and abundance of forage populations such as shad and sunfish.

You do not have to be a member of LBCC to attend this presentation. Everyone is welcome. The meeting will be held at 7:00 pm on August 16th at the LCRA building located on RR 1431 just south of Hwy 29 in Buchanan Dam.

The LBCC is a non-profit organization dedicated to improving the Lake Buchanan area. They meet regularly on the third Tuesday of every month. Check out their website at www.lakebuchananCC.org.
